Editor News Question: Why is this software failing to open a file at one point and opening the file in another without prior warning? I have enabled Support, I have tried to get support but it is failing on opening the source code of the file. I will not be able to get any hope of opening a file by disabling the MSVCP100.dll library. I have added the software to the toolbar without any issues. Please respond Question: I have a file cabinet "C:\SCRIPTS\attributes.xml" which contains a large number of files. These files contain many spaces which are not relevant to the file content. However, some of these files open up another xml file as the name of the file is also the name of the xml file. The software is unable to detect such issues and also unable to open the file. Question: How to use this software? Using in which language? There is a folder "Files" and many other files are in it. Is there any conditions for this software? The software is not working in the folder which contain 200 files. The software is not working in the folder which contain more
