Elden Ring is a fantasy action RPG that allows you to create your own character in a vast world where open fields with various situations and huge dungeons with complex and three-dimensional designs are seamlessly connected. As you explore, the joy of discovering unknown and overwhelming threats awaits you. A multilayered story told in fragments, an epic drama. A STORY ABOUT MOMMY "Because of the Lies, Because of the Deceptions." The world is no different today than it was 20 years ago. On the surface of the world, the Great Dogmas have passed, and the end of the world is nigh. The remaining few humans are scattered and near-homeless in the towns and cities. Hungry and diseased, they have lost their pride and endurance. Yet a slight spark of hope still remains in their heart. Amidst the ruins of times long past, human and beast coexist. In order to survive, they must somehow keep their fragile hope alive. "Because of the Lies, Because of the Deceptions." A Fantasy Adventure RPG Elden Ring is a fantasy action RPG with the integration of unique online play. Introduction The Lands Between, which is the main setting of the game, is a vast world where the ground is just as sky and time is only counted in hours. It spans north to south and east to west, with the northern and eastern portions populated by various groups, while the south is mostly a desert. Rather than a large region by itself, the Lands Between is made up of a number of smaller regions called "nebuloids." Despite its vastness, the Lands Between has various landscapes and regions. There are huge grasslands and a desert, while inland you'll find dense forests and slag, a wasteland of coal and slag from the Great War, and vast underground caverns. Still, not every surface can be seen in the real world from a certain distance. You can only see land that's about 100 meters from you, and you can only see the surface of other nebuloids that are about 200 meters away. If you're closer than that, the surface will be an extension of the nebuloid under the ground. Crafting has been added to the game. Equipment and skills can be freely edited, for both new and old equipment is acquired using crafting ingredients found in the world. Furthermore, skills and effects can be customized, altering the role and the flavor of the equipment and magic in your hands. The Lands Between is full of countless adventures. You can participate in them all by yourself, or open up your party to others to play together. The player will step into the role of an adventurer who will need to fight enemies and gather ingredients for crafting, and will take on a job to earn EXP and cash. In the process of obtaining the experience and cash, you'll encounter various other characters (including NPCs, monsters, and your own party members) while exploring the world. The battles play out in real time, and you'll be able to freely move around when using skills and weapons. However, once you're in battle, your actions will be logged, and you'll have to deal with being under the effects of statuses or having enemies under your control. Along the way, you will also come across other adventurers, and even if you do not take part in their battles, you may have to give them a hand in exchange for rewards or with your assistance. The game

What's new in Elden Ring:

Enjoy beautifully detailed, dynamic graphics, each with a vivid outlook and rich color. Additionally, you can freely access the 'Demo Dungeon' and gain action as a Hero without registration. Plus, for a limited period, you can even download 'Legend of Heroes Actions', an extensive free-of-charge plugin.

As an added bonus, the data saved in 'Legend of Heroes: Actions' can be stored and played in World of Conflict: Chronicles.

Q: Let me see the results, let me see the upvotes, let me see everything! I believe that analytics is a very useful thing. But there is a lot of data there, and it is pretty hard to figure out which results are real or the result of user bias. So here I am, a user with more than 1,700 questions and over 800 answers, and I want to see all of it! I'm going to get the data from my account and put it on SEDE. If I did it, some time will pass before I put the data there, and you might be seeing very old data already. But let me show you how it is done. The data I know that I am an avid user, and I've got a lot of questions with a lot of answers. This doesn't mean you should see all of them. I have seen some old data, so I'm going to restrict the number of questions I show (but I'm going to show all my answers). This means that I will be showing you 12 questions, and about 25 answers. Next thing is to see the data. Let's start with questions (because we have to answer 10 in order to see all the data). Here are the 12 questions I'm going to show you: Does "when" matter in database transaction isolation levels? What are the memory-usage implications of using the NOLOCK hint? When to use a 'WHERE NOT EXISTS' SQL query In SQL Server, is there any significant performance difference between a normal JOIN and a LEFT JOIN with an ON clause containing a WHERE? Is "native" cursors/stored procedures bad practice in MySQL? If you have a task that will run for hours, is it wise to create a stored procedure that loops? When should you batch queries in T-SQL? What does SQL Server use to serialize a query? Does the 'INSERT' statement in SQL Server guarantee unique values? How to update a table column in SQL Server? SQL Server 2012 question mark or?? Does the order of columns in a CREATE TABLE affect performance? Here are the 25 answers I'm going to show you: What happens when you chain multiple UPDATES in a stored procedure? How to synchronize data on a multi-user environment? What is the best database for a massive workflow? What is the
