Born in a fantasy world, hundreds of years ago, a legend exists of a certain race of people known as the Elden that discovered the eternal power of the Elden Ring. The Elden Ring has a strange power, not found in any other object, that allows them to create a portal of time and space called a Foryxion Gate. Through this gateway, they sent forth their agents, the Elden Lords, to protect and manage the various lands. However, the Dragon King, the most ferocious and powerful of the Elden Lords, vanished, and the power of the Elden Ring was engulfed in an age of chaos. A thousand years later, a boy named Athalia entered the Foryxion Gate as a failed adventurer, and teleported to a world known as the Lands Between. In this world, the identity of the boy who teleported was lost, and he began his journey to become a legendary warrior known as "the Tarnished". Through the adventures he had in this world, he began to understand the secret of the Foryxion Gate, and how to use the power of the Elden Ring. The very existence of this world was based on the very balance between the power of the Elden Ring and the power of the Dragon King. In this age of uncertainty, the Dragon King began to awaken again. The ultimate goal for the Dragon King is to destroy the Elden Ring, and he will not stop to pursue this goal. - Features - • An Epic Story: The fate of this world and the fate of the Tarnished are entwined with that of the Dragon King, the most powerful entity in the Land Between. • Vast World: A vast world where open fields with a variety of situations and huge dungeons with complex and three-dimensional designs are seamlessly connected. The world of the game is divided into five very large regions: Waking Marshes, Frosts of Granite, Pavements of Amber, Hives of Ambushes, and Fields of Gloom.
Players can freely alter the aspects of the campaign that they wish to change, as well as customizing key items such as the weapons, armor, and magic that the characters will be able to use.
Customize your characters in many different ways, from the weapons they wield, to the spells that they cast.

The characters of the game – Arasmotoren, the fearless warrior; Hedra, the master of martial arts, and Kaltte, the frogman – swing their swords, hammers, and lances with authority, and are always accompanied by grim traitors of the ancient Order of the Elden Ring.
A host of innovations – such as the Map Helpers, the Bestiary, and the Quest Book – are designed to rekindle the memories of the story and furnish treasure that are not usually accessible by players.
Several systems have been developed to allow the character to be well-balanced by providing an appropriate bonus based on the character's posture and strength.
It is also possible to change the aspect of the battles, such as the entire formation of troops, for four times per turn. It is also possible to change the specific attributes of the corresponding battles.
Under YYCombat's original rules, players can take on an MMO-style online battle. When two players wish to play in an online battle, they will be matched with each other, and the battle will be started. Players can solo the battle,

Play Rodsan Online With Your Friends Using the Online Play Function Available in Rodsan Online

Online play in Rodsan Online is a revolutionary concept based on Asynchronous Multiplayer developed by Flora, the creators of Rodsan Online. Asynchronous Multiplayer allows players to interact with each other as though they were playing on the same map without any direct communication, without having to connect to a server. Rodsan Online features existing functions such as voice chat, in-world communication, and an in-game trading card function.

In Rodsan Online, there are different types of players, including nameless (free) players, member players, and country players. Nameless and member players can engage in asynchronous multiplayer at any time, but country players and summoners can only interact in offline play.

Players can also join a summoned country of other players. A country consists of 4 individuals and 4 followers. Followers inherit the attributes of the country and the weapons of the summoned country.

You can not only possess a summoned country but also gain independent power. To do so, you can summon a country that possesses a hero, also known as an Elden Lord. A hero isn't actually controlled, but has attributes and its own dialog. Once you gain the power of an Elden Lord, your power will be inherited to your followers.

Below are the six countries where you can meet other players to play offline:

1. Republic of Eros
- The Kingdom of Hiron - The territory of Borica - The territory of Melocithias - The territory of Ahatzagi - The region of Lersal

Laval supercomputer in detail. The A.C.T. Laval supercomputer has been created for the A.C.T. network with the help of CFI, CIFAR, MITACS and other partners to increase the density of computing power for the acceleration of discovery. In the two core municipalities of Laval, 80 kilometres north of Montreal, a concentrated research cluster is forming around the CIFAR institute. The institute has the largest computational facility in Canada, the Vérité centre, which has 3,120 processors and 3,000 terabytes of storage capacity. It is designed to be able to manage 3 million calculations per second. In addition to Vérité, the Laval region has five other research and teaching centres equipped with 2,000 to 2,500 processors and 1,000 to 1,500 terabytes of storage capacity: the CITM campus, the CRIU, CRAF, the Institut de recherche de l'Université de l'Aviation de Montréal (IREM), and the Institut de recherche en communication et en informatique de l'Université de Montréal (IRCUIM). A dedicated communications network is also available to ensure the links with other centres, including connections to the CRASH supercomputer. Additional facilities include a spectrum of laboratories and workshops. A total of eight research institutes in Quebec are part of the A.C.T. network, including the National Research Council of Canada, Montreal Institute of Theoretical Physics, University of Montréal, École Polytechnique de Montréal, the Laval Research Centre, McGill University, and Université Laval. Collaborating in the research being carried out in these institutes are researchers from the United States, United Kingdom, Israel and Russia.
