After you have successfully passed the free test, there are other tasks that help you to become a real.Q: JAVA - Unable to start activity componentInfo First of all let me say that I am new to android development, and I am trying to make an application that connects to my internet service, and downloads information from there. My problem is that the application crashes on startup, with the error message:

```
java.lang.IllegalArgumentException: Unable to instantiate activity
ComponentInfo{com.espn.espn/com.espn.espn.MainActivity}:
java.lang.ClassNotFoundException: com.espn.espn.MainActivity in loader
dalvik.system.PathClassLoader[/data/app/com.espn.espn-1.apk] I have been
looking into this issue for hours, and none of the solutions I found helped. I did
set setProjectPath to my MainActivity.java. I am using eclipse, and the error
happens the moment the app is launched. Here is my java code: package
com.espn.espn; import android.os.Bundle; import android.app.Activity; import
android.content.Context; import android.content.Intent; import
android.view.Menu; import android.view.MenuItem; import android.view.View;
import android.view.View.OnClickListener; import android.widget.Button;
import android.widget.Toast; public class MainActivity extends Activity
implements OnClickListener { private Button bouton; @Override protected
void onCreate(Bundle savedInstanceState) {
super.onCreate(savedInstanceState); setContentView(R.layout.activity_main);
bouton = (Button) findViewById(R.id.button); bouton.setOnClickListener(this);
Intent intent = getIntent(); String uri = intent.getStringExtra(MainActivity.URI);
```

I want to change by() function from the package metaprogramming. I write in.jl file function sum_by(T::Type{x+1}) But I get an error: ERROR: LoadError: UndefVarError: x not defined I don't know why this error appear and how to fix it. A: It seems you are trying to do the following: julia> macro sum_by(x::AbstractArray{Int64,1}, n::Int, f::Int -> Int64) n = n @def macro sum_by(x, f) for e in eachindex(x) @eval f(x[e]) end end sum_by (generic function with 1 method) julia> x = Abstract
