Gran Turismo is a racing simulator. The player can compete in various motorsport series such as. The game was released on the PlayStation 2 system for PC download on the Windows Operating.Q: Examples of real time software systems that service requests, but do not involve user interaction I'm a software engineer who works on a system that services requests from external clients. I have a general sense of how all software should work, and it seems clear to me that the software should do exactly as the specification describes. But if I'm giving demos to potential clients, should I skip the part where we ask them to interact with the system to see how it works? Or should I just have someone standing next to the computer and pressing buttons? A: If you are planning to show the system to a potential client and you want to really highlight the'real time' behavior of your system, you can ask him to insert real input like a key or mouse click using a test suite. If you want to get really real, you can ask him to do anything he wants using your shell. If 0cc13bf012
