Today, AutoCAD Cracked 2022 Latest Version is used by all kinds of designers and architects. More recently, companies are beginning to use AutoCAD to generate 3D models for physical objects that are then sent to production for 3D printing. AutoCAD is the world's second-largest software company, with more than 9 million active users. AutoCAD Crack+ [Latest] 2022

Current developments Version 2017, released in December 2015, added Adobe Illustrator (.ai) and Adobe Photoshop (.psd) vector file import and export as well as more editing and navigating features for both. Version 2017 made the new template-based interactive 3D view (3DV) accessible to all users, as well as the ability to annotate 3D models. Version 2017 added five new templates - Citations, Musical Instruments, Vehicles, Plants, and Toys - that support the use of templates to automatically create a blank drawing. A template in AutoCAD is like a master template for a drawing and its various parts. To use a template, the user places drawing objects on a template and uses AutoCAD's "fit" command to automatically fit the template to the objects. Version 2017 added a new user interface that uses the Windows 10 "Action Center" or "Charms" UI to provide more useful information and quick access to commonly used tools and options. AutoCAD 2017 was also the first

version of AutoCAD to support Microsoft Windows 10 64-bit operating system. Version 2018 released in February 2017 included a new feature in the Express Tools for loading BIM data. With the release of AutoCAD 2018, users can load and open BIM data from the "Save to Model" tool available in the Data Management toolbar. Version 2019 was released in July 2017 and introduced a new design language called "Graphite." Graphite adds bright, clean lines, clearer group and ribbon icons, and a new "Sparkline" graphics style. Additionally, it adds improved AutoCAD Physics, a new Material Styles option, and support for the open-source V-Ray rendering engine, available from V-Ray for AutoCAD. Version 2020 includes a major overhaul of the user interface. It includes a new My Pro button on the ribbon, a settings menu, and a new "Export to Cloud" option to export to SharePoint. Version 2021 is currently in development and expected to be released in July 2021.
