# Acereader Pro Deluxe Plus 7.2.0 Serial

Acereader is a Productivity/Educational Self-Improvement Reading Software.Speed Reading Software. Read faster while on your computer by reading in Rapid Serial Visual Presentation (RSVP) mode. In RSVP mode the words come to your eyes instead of your eyes going to the words. Learn to read faster both on and off your computer by practicing to read in RSVP and Tachistoscopic Scroll mode at configurable speed settings. In Tachistoscopic mode, your eyes are forced to move in normal fashion but at preset speeds. Comes complete with reading/comprehension tests that are broken out by grade levels. Test results are logged on a per user basis and can be viewed graphically. Designed for use by all ages (from the high powered executives that needs to read faster in today's information age, to children just learning how to read). Can be used to rapidly read and skim text found in documents and your clipboard. Using the clipboard allows for reading text from other applications like your favorite word processor and text from the Internet (i.e. web pages, email, news groups...). Many options: set font, set background color, set mode (Center Text, or Eye Trainer Scroll), number of words or lines per flash, column width, set delays (if certain punctuation or long words are found), set burst reading lengths. Main screen allows for setting current document position, setting speed, burst back/repeat/forward, Search-N-Read options, and displays your last reading speed. Includes online help. If you have a new computer with the latest version of Windows operating system, you should check the latest operating system version before running AceReader to prevent errors. If you do not have the latest version of Windows, you can download it from the official Microsoft website. Another way to ensure that you have the latest version of Windows is to check the "About" section in the Windows operating system startup menu.
