believe it or not, not all of us have the time to  
download apps every time a new update is  
released. some of us also have to deal with  
the lag that is caused by a network that  
requires a lot of bandwidth to download apps.  
when that happens, you will be stuck at the  
waiting screens of different websites. luckily,  
some of these websites will send you a  
desktop shortcut that you can use instead of  
going through the waiting screens. this  
feature is known as an auto-updater.  
unfortunately, none of the website that we  
found sent us the desktop shortcuts.  
however, you can still download them. the
